PALMS

Palms 1
PA01 121
Adonidia merrillii
Golden vitcgia palm
PA02 122
Adonidia merrillii
Green vitchia palm
PA03 123
Archontophoenix
Alexandrae (king palm)
PA04 124
Archontophoenix
Cunninghamiana piccabeen palm
PA05 125
Archontophoenix
Myolensis (myola palm)
PA06 126
Areca catechu cv.alba
Betel nut palm
PA07 127
Areca catechu
Dwarf betel nut palm
PA08 128
Areca catechu
Betel nut palm
PA09 129
Areca macrocalyx
Kawiwi palm
CP PA10 130
Areca triandra
Triandra palm
PA11 131
Areca vestiaria
Langlois palm
PA12 132
Arenga obtusifolia
Lang kap palm
PA13 133
Arenga pinnata
Black sugar palm
CP PA14 134
Arenga tremula
Dwarf sugar palm
PA15 135
Bismarckia nobilis
Bismarck palm
PA16 136
Borassus aethiopum
African palmyra palm
Pa17 137
Borassus flabellifer
Palmyra palm
PA18 138
Brahea armata
Blue hesper palm
PA19 139
Butia capitata
Wine palm
PA20 140
Butia paraguayensis
CP PA21 141
Caryota mitis
Clustering fish tail palm
PA22 142
Caryota urens
Giant fish tail palm
CP PA23 143
Chamaedorea costaricana
Pacaya palm
PA24 144
Chamaedorea elegans
Parlour palm
PA25 145
Chamaerops humilis
European fan palm
PA26 146
Coccothrinax argentata
Silver thatch palm
PA27 147
Cocos nucifera
Coconut (east coast tall)
PA28 148
Cocos nucifera
Coconut (ceylon orange)
PA29 149
Cocos nucifera dwarf
Coconut
PA30 150
Cocos nucifera
Coconut malayan golden yellow

PALMS

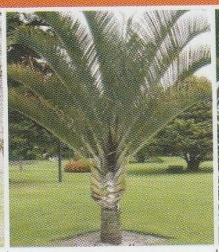

Palms

PA31 151
Copernicia hospita
Cuban wax palm

CP PA32 152
Cyrtostachys renda
Sealing wax palm (lipstick)

PA33 153
Dypsis decaryi
Triangle palm

PA34 154
Dypsis leptocheilos
Red neck palm

CP PA35 155
Dypsis lutescens
Golden cane palm

PA36 156
Elaeis guineensis
African oil palm

CP PA37 167
Euterpe oleracea
Assai palm

PP PA38 158
Howea forsteriana
Kentia palm

PA39 159
Hyophorbe lagenicaulis
Champagne palm

PA40 160
Hyophorbe verschaffeltii
Spindle palm

PA41 161
Latania loddigesii
Bule latan palm

PP PA42 162
Latania lontaroides
Red latan palm

PP PA43 163
Latania verschaffeltii
Yellow latan palm

PP PA44 164
Licuala grandis
Licuala palm

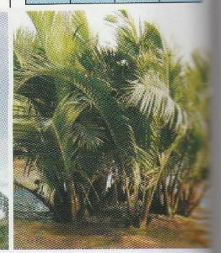

PP PA45 165
Licuala peltata
Giant fan palm

PP PA46 166
Livistona chinensis
Chinese fan palm

PP PA47 167
Livistona rotundifolia
Foot stool palm

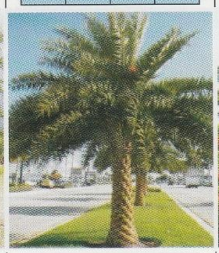

CP PA48 168
Nypa fruticans
Mangrove palm

PA49 169
Phoenix dactylifera
Date palm

PP PA50 170
Phoenix roebelenii
Pygmy date palm

PA51 171
Phoenix sylvestris
Indian date palm

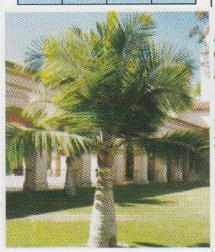

PP PA52 172
Pritchardia pacifica
Fiji fan palm

PP PA53 173
Pritchardia thurstonii
Thurston palm

PP PA54 174
Pscudophoenix ekmanii
Cacheo palm

PA55 175
Ravenea rivularis
Majestic palm

CP PA56 176
Rhapis excelsa
Lady palm

CP PA57 177
Rhapis humilis
Slender lady palm

PA58 178
Roystonea regia
Cuban royal palm

PA59 179
Washingtonia filifera
Petticoat palm/desert fan palm

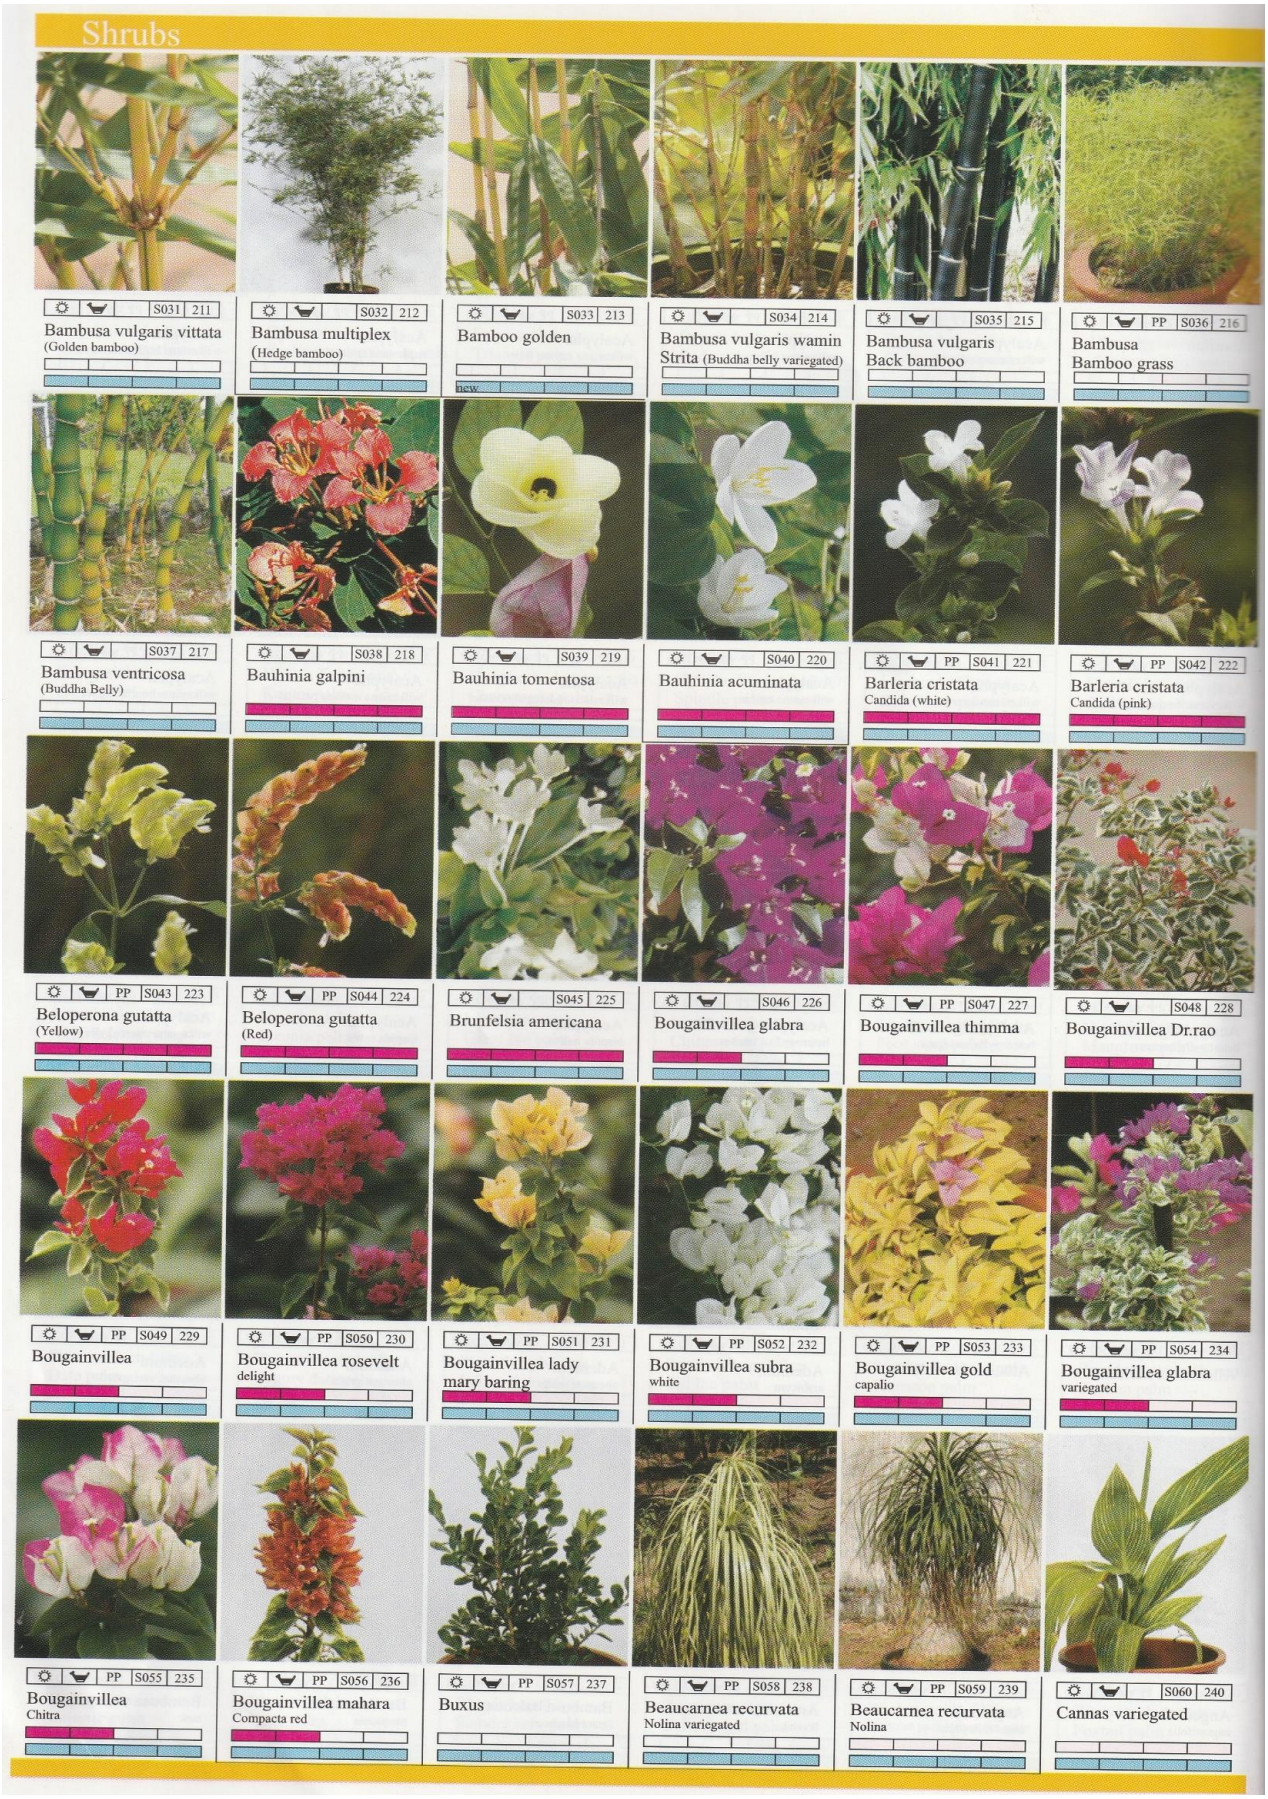

PA60 180
Wodyetia bifurcata
Foxtail palm

COLOUR

The paramount purpose of bedding plants in the garden is to provide colour. As a rule it is not for their architectural shape, greenness nor air of permanence – they are grown for their colour.

For this reason an understanding of colour is important if you want to get the best out of them. This does not mean having to learn a list of rules on what goes with what and how to avoid colour clashes – "never put shocking pink next to orange or dark crimson" and so on. These purist rules are less important in the garden than is often supposed. The reason is quite simple – a solid sheet of colour placed directly next to another with which it clearly does not harmonise can clearly be distasteful and this does occur in interior decoration, dress etc., In a garden, however, the various hues, shades and tints are broken up by green foliage and earthen shades which dilute so-called colour clashes.

The purpose of this chart is to show you how to make colour work for you in the garden, and the basis of colour theory is the classic wheel shown beside. As you can see there is a basic division into warm and cool colours. To make a plot look longer, plant warm-colour flowers as close as you can to the point from which you view the garden and put in cool-colour varieties right at the back. The weather has an effect on the appearance of flowers – pastel shades can look quite washed out in brilliant sunshine but their colour is heightened on dull days.

Within this broad span of warm and cool colours you will find a number of individual hues. There are basically three ways of putting these hues together in an harmonious way – that is, a way in which they will 'go together'. The boldest way is to match contrasting colours, the most restful way is to match analogous colours which lie next to each other on the wheel and the most subtle way is to use the tints and shades of a single hue.

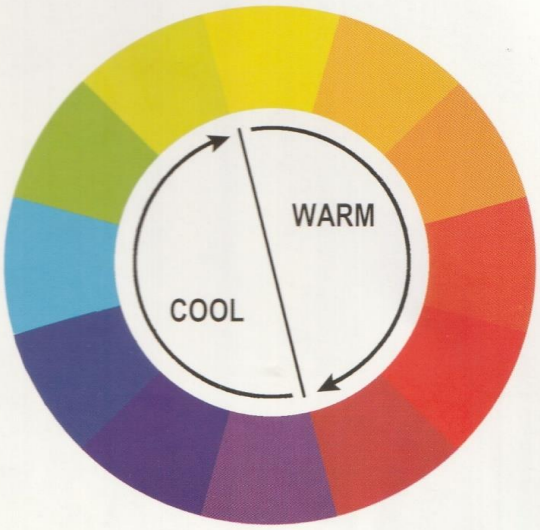

THE WARM COLOURS

The warm colours liven up the area in which they are grown. The hues are noted for their dramatic effects- the planted area is highlighted and the eye is diverted away from cool colours. the most important feature of warm colours is the way they make the flowers look closer than they really are.

THE COOL COLOURS

The cool colours quieten down the area in which they are grown.The hues are noted for their restful effect and the way the planted area seems less oppressive on hot days, but the colours are over shadowed if planted next to bright warm colour. The most important feature of cool colours is the way they make the flowers look further away than they really are.
